

JOIN THE UK'S BIGGEST NETWORK OF SIGNAGE MAINTENANCE ENGINEERS

SIGNAGE SUB-FASCIA TECHNICAL ENGINEER TEAM / CARPENTER / JOINER

Would you like to join a successful business supporting some of the UK's most iconic High Street names?

We are looking for skilled and detail-oriented Sub-Fascia Repair Technicians to join our team. In this role, you will be responsible for assessing, repairing, and maintaining sub-fascia components of buildings. The ideal candidate should have a strong background in carpentry, excellent problem-solving skills, and a keen eye for detail.

Responsibilities

Inspection and Assessment. Conduct thorough inspections of sub-fascia components to identify damage, rot, or deterioration. Assess the extent of repairs needed and develop a comprehensive plan to address issues.

Repair and restoration

Execute repairs on sub-fascia, including the replacement of damaged or rotted sections. Use appropriate materials and techniques to restore structural integrity and aesthetic appeal.

Carpentry skills

Demonstrate proficiency in carpentry techniques, including measuring, cutting, and shaping materials for precise fits. Work with a variety of materials, such as wood, PVC, or composite, depending on project specifications.

Quality assurance

Conduct quality checks on completed sub-fascia repairs to ensure they

meet industry standards and client expectations. Make any necessary adjustments or improvements to achieve optimal results.

Safety Compliance

Adhere to all safety regulations and guidelines during repair activities. Utilize personal protective equipment (PPE) and ensure a safe working environment.

Documentation

Maintain accurate records of repairs performed, materials used, and project timelines. Provide detailed reports to project managers or clients as needed.

Requirements

Proven experience in carpentry, specifically in sub-fascia repair or similar roles. Strong knowledge of construction materials and techniques. Ability to interpret building plans and specifications. Excellent problem-solving and troubleshooting skills. Physical fitness and ability to perform tasks that may involve climbing and working at heights. Knowledge of safety protocols and willingness to adhere to them.

If you have a passion for carpentry and a track record of successfully repairing and restoring sub-fascia components, we invite you to apply for this position. Join our team and contribute to the maintenance and improvement of building structures.
